Semester: Fall 2018-19	Project Title: Multiple Choice Quiz System	Group No:

Project Information

Short Description (Max 100 Words)

The system can be logged in with a user id and password. Also, a user can sign up if not logged in. Then a number of questions will come for 4 categories to the interface and the answers are stored in the database. The user can choose the category of questions. We have a vision of bonding a time limit for the quiz. In the end show evaluation/ obtained marks.

Check List:

☐ Types of User with different features **>= 2**.
☐ All the GUIs are connected/ Menu Items
☐ Logical CRUD operations on database. [**C R U D**] (insert, update, delete, search [Bonus])
☐ Object Oriented Programming Principles
☐ Different classes for view [UI] and model [Database Connectivity]
